

FLEXIBLE FOLDABLE MULTI-ARTICLE STORAGE CARRIER

ABSTRACT

5

A multi-article storage carrier is based upon a sheet of flexible material comprising a plurality of compartments on one side for containing the articles, the sheet being folded at least once in each direction to form the carrier and enclose the articles securely. Securing and carrying means such as straps are provided on the surface of the sheet opposite the compartments so that they are exposed for use when the carrier is folded and/or rolled for carrying.
